Hi, Erin-

I think I'll be verbally approving the use of SBI -02 on today's call. I'll send them something in writing later today or tomorrow.

Thank you!
Michelle-

Sounds good. Yes, I'll be on Monday's call. We'll support EPA, whichever route you'd like to go.

If you do decide to send the before the call email, I just realized I had a typo. It should say the northwest corner, not the northeast. The difference between paper north and true north messes with my brain.

Thank you, Erin. We may end up letting them know on Monday's call. Will you be attending on Monday?

Michelle,

Language below:

USACE and EPA approve qualitative use of historical boring PPP-SBI-02 as a point of delineation for the northeast corner of the molding room. For the purposes of modeling the extent of treatment needed near SB-08, please consider the data from PPP-SBI-02 as qualitative (e.g., below the cleanup goal).

Let me know if you have any other questions.

Erin Hauber, P.E.
